

CALUMET STORMWATER COLLABORATIVE

Purpose: coordinate across boundaries and jurisdictions to solve regional stormwater and flooding challenges.

Mission: build intergovernmental and cross-sector partnerships to increase the effectiveness of stormwater management initiatives for the communities and ecosystems of the Calumet region through knowledge sharing, coordination and deployment of interventions at appropriate scales.

Vision: be a model of coordinated deployment of knowledge, technology and financial resources to minimize the negative impacts of precipitation and maximize the positive impacts to make the Calumet region a better place to live, work and recreate.

The Metropolitan Planning Council (MPC) facilitates the Collaborative, whose members are key stakeholders controlling land, infrastructure, financing tools or regulatory powers related to stormwater. The Calumet Stormwater Collaborative is one of the priority projects of the Calumet Collaborative, which catalyzes innovative partnerships to advance a thriving Calumet region.

CSC Membership

Membership is open to a diverse range of stakeholders, including municipalities, government agencies, nonprofits, conservation groups, land owners and managers, associations and more.

A full list of partners is available at metroplanning.org/calumet.

Membership benefits include

- Peer Networking
- Stormwater Management Resources
- Information Sharing on Member Organization Events & Outreach Efforts
- Collaboration Opportunities
- Notice of Funding Opportunities

Initiatives-at-a-Glance

- Open GIS stormwater and green infrastructure data sets, model and templates
- Trainings and resources for stormwater management, green infrastructure and funding
- Green infrastructure installation, maintenance and workforce development guidance and evaluation
- Local community engagement and communication

How To Get Involved

- Become a member – sign-up for regular news and announcements
- Attend monthly meetings
- Access and share GIS data
- Advocate for nature-based solutions in your community
