

INTRODUCTION

OMNI

Omni Ecosystems® integrates science and design into working landscapes to improve resiliency within the built environment and empower healthier and happier humans.

Vertical Integration

Omni provides landscape architectural services and green infrastructure products, and leads the industry with each specialty's deep expertise:

- **Omni Rewild** equips design & trade professionals to grow soil & life anywhere through **Omni Infinity Media** material & process.
 - **Omni Workshop** designs spaces for people, embracing nature to test and advance the ecology & culture of place.
-

Project Spectrum

Omni's teams engage at many points on a project's spectrum.

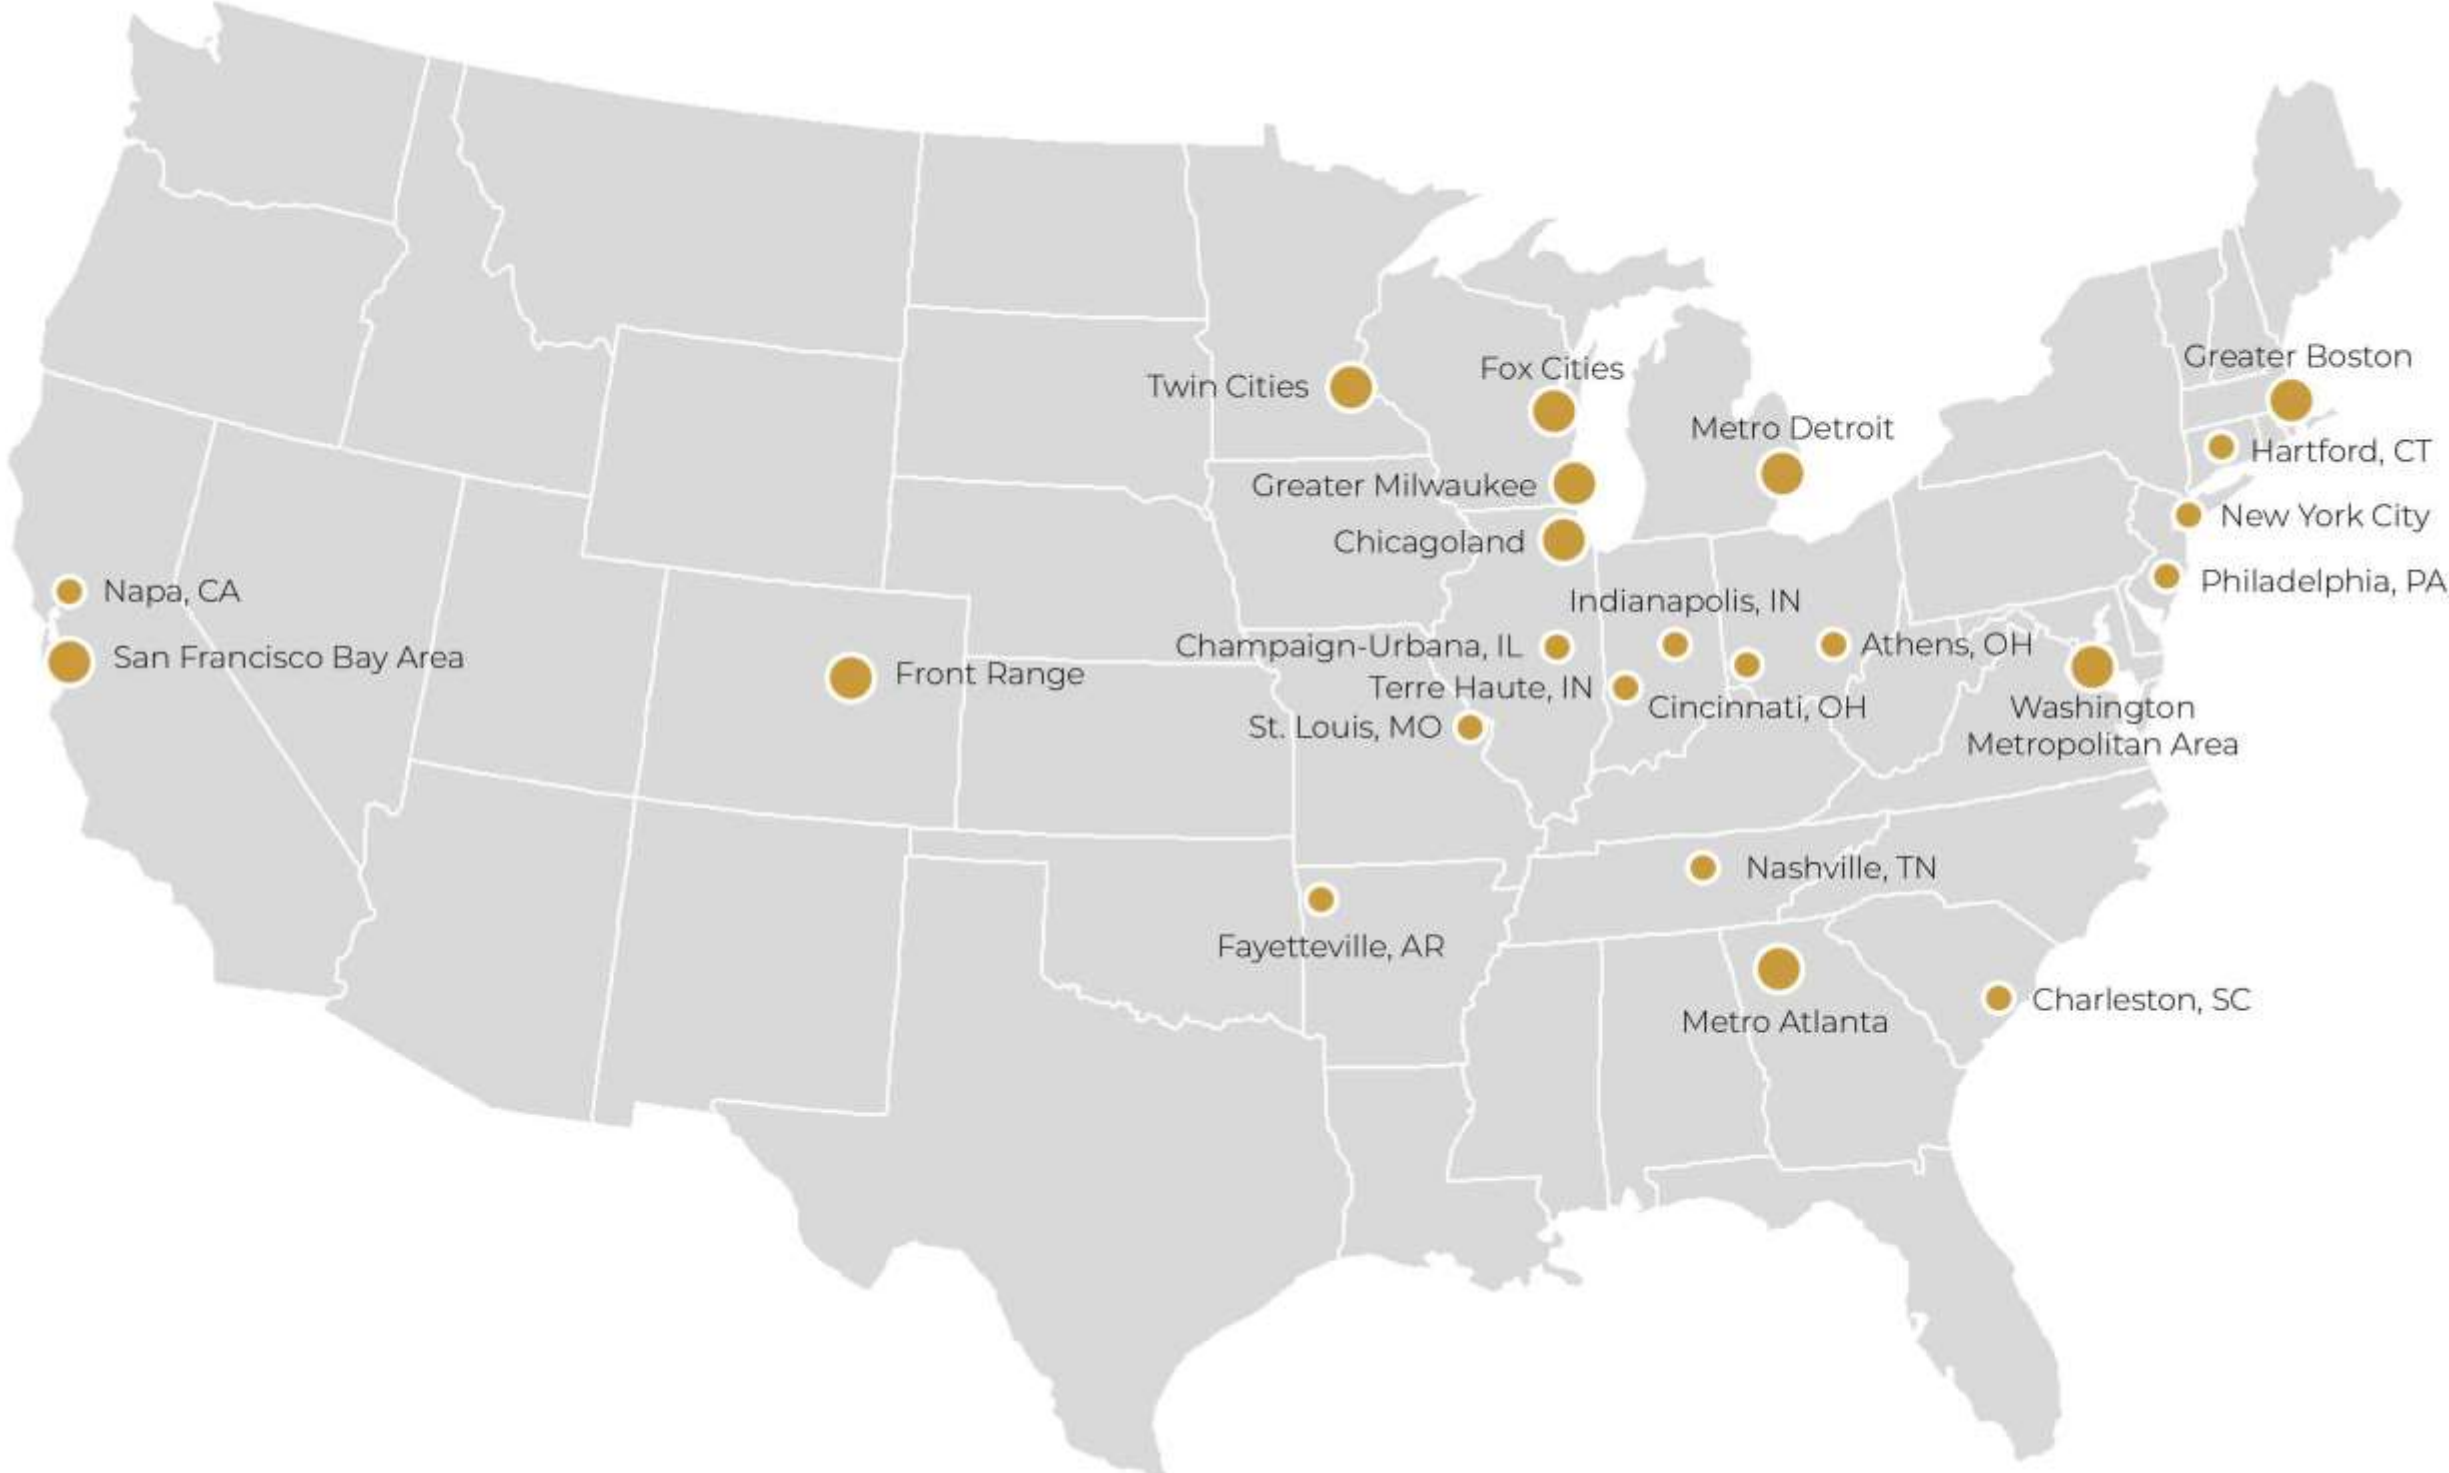

Partners & Collaborators

We work with **architects, designers, landscape architects, engineers, general contractors, developers & owners.**

We work across sectors including **higher education, corporate, hospitality, healthcare, nonprofit, & residential.**

Omni Works Nationwide

Stacking Functions

Our work results in better **stormwater retention**, better **energy savings**, better **maintenance track record**, **safer and healthier foods**, more **beautiful landscapes**, more **verdant habitat**, more **robust and resilient ecosystems** that provide multiple ecological services.

Stormwater Management Review & Approval

The **utility & performance** of Omni Infinity Media is proven by its review & approval for stormwater management by multiple **cities & municipalities across the nation**

Optimized Engineered Media

Mimics the physical, biological & chemical properties of soil with minimal organic matter inputs to ensure continued functionality

Allows for the necessary infiltration to ensure system weights remain constant to meet structural capacity loads while maintaining needed minimal weights to meet wind uplift standards

Permits healthy, robust plant growth with minimal chemical inputs

Enables root systems to become an integral part of green roofs to meet ANSI/SPRI wind guidelines

**VEGETATION FROM SEED, PLUG, ACCENT
OR VEGETATED MAT (SEDUM OR SOD)**

OMNI INFINITY GROWING MEDIA

IRRIGATION

**DRAINAGE, FILTER, & CAPILLARY FABRICS
ROOT BARRIER**

12+ INCHES

TREES OF VARIOUS SIZES

Unlocking Limitations & Delivering Greater Outcomes at Lighter Weight

Omni Infinity Media's **high stormwater retention & ultra-lightweight qualities** enable this **optimized engineered growing media** to **remove limitations** that traditionally exist for landscapes & **support resilient long-term plant communities.**
